Shalini Sudhersan

Software Developer | Back-End Developer | Machine Learning Enthusiast

I am a passionate software developer with a strong focus on back-end development and machine learning. My goal is to build innovative, reliable, and scalable systems that address real-world problems. I am an enthusiastic learner and always open to new challenges.

Work Experience

Software Developer Intern - Tech Company (2023-2024)

During my internship, I developed and maintained back-end APIs using Python and Flask. I collaborated with the team to implement machine learning models for predictive analysis, ensuring seamless integration with existing systems.

Back-End Developer - Freelance Projects (2022-2023)

I worked on several freelance projects focused on back-end development using Python, Django, and SQL databases. I designed and optimized APIs for high-traffic environments, ensuring performance and scalability.

Education

Bachelor of Engineering (CSE)
DMI Engineering College
2020-2024

Team Lead - Hackathon Project - University (2023)

Led a team of 5 students in a hackathon where we developed an early warning system for Glacial Lake Outburst Floods (GLOF). I handled the back-end development and machine learning model integration.
